# MEET EMERGE

Emerge is a solutions development lab using emerging technologies to address pressing humanitarian issues. Our products enable the more efficient, more humane, and more transparent movement of people, goods, data, and resources around the world.

For our work, Emerge has been nominated to the 2018 Global SDG Awards and the 2019 Newsweek Blockchain for Impact Awards. Our founder is currently nominated for MIT Technology Reviews Latin American Innovators Under 35, the Royal Bank of Canada's Women of Influence Awards, and Acquisition International's Influential Businesswomen Awards.

For more information about Emerge, please visit [www.emergedev.co](http://www.emergedev.co) or write us at [hello@emergedev.co](mailto:hello@emergedev.co).

# OUR WHY

THE CURRENT STATE OF THE WORLD

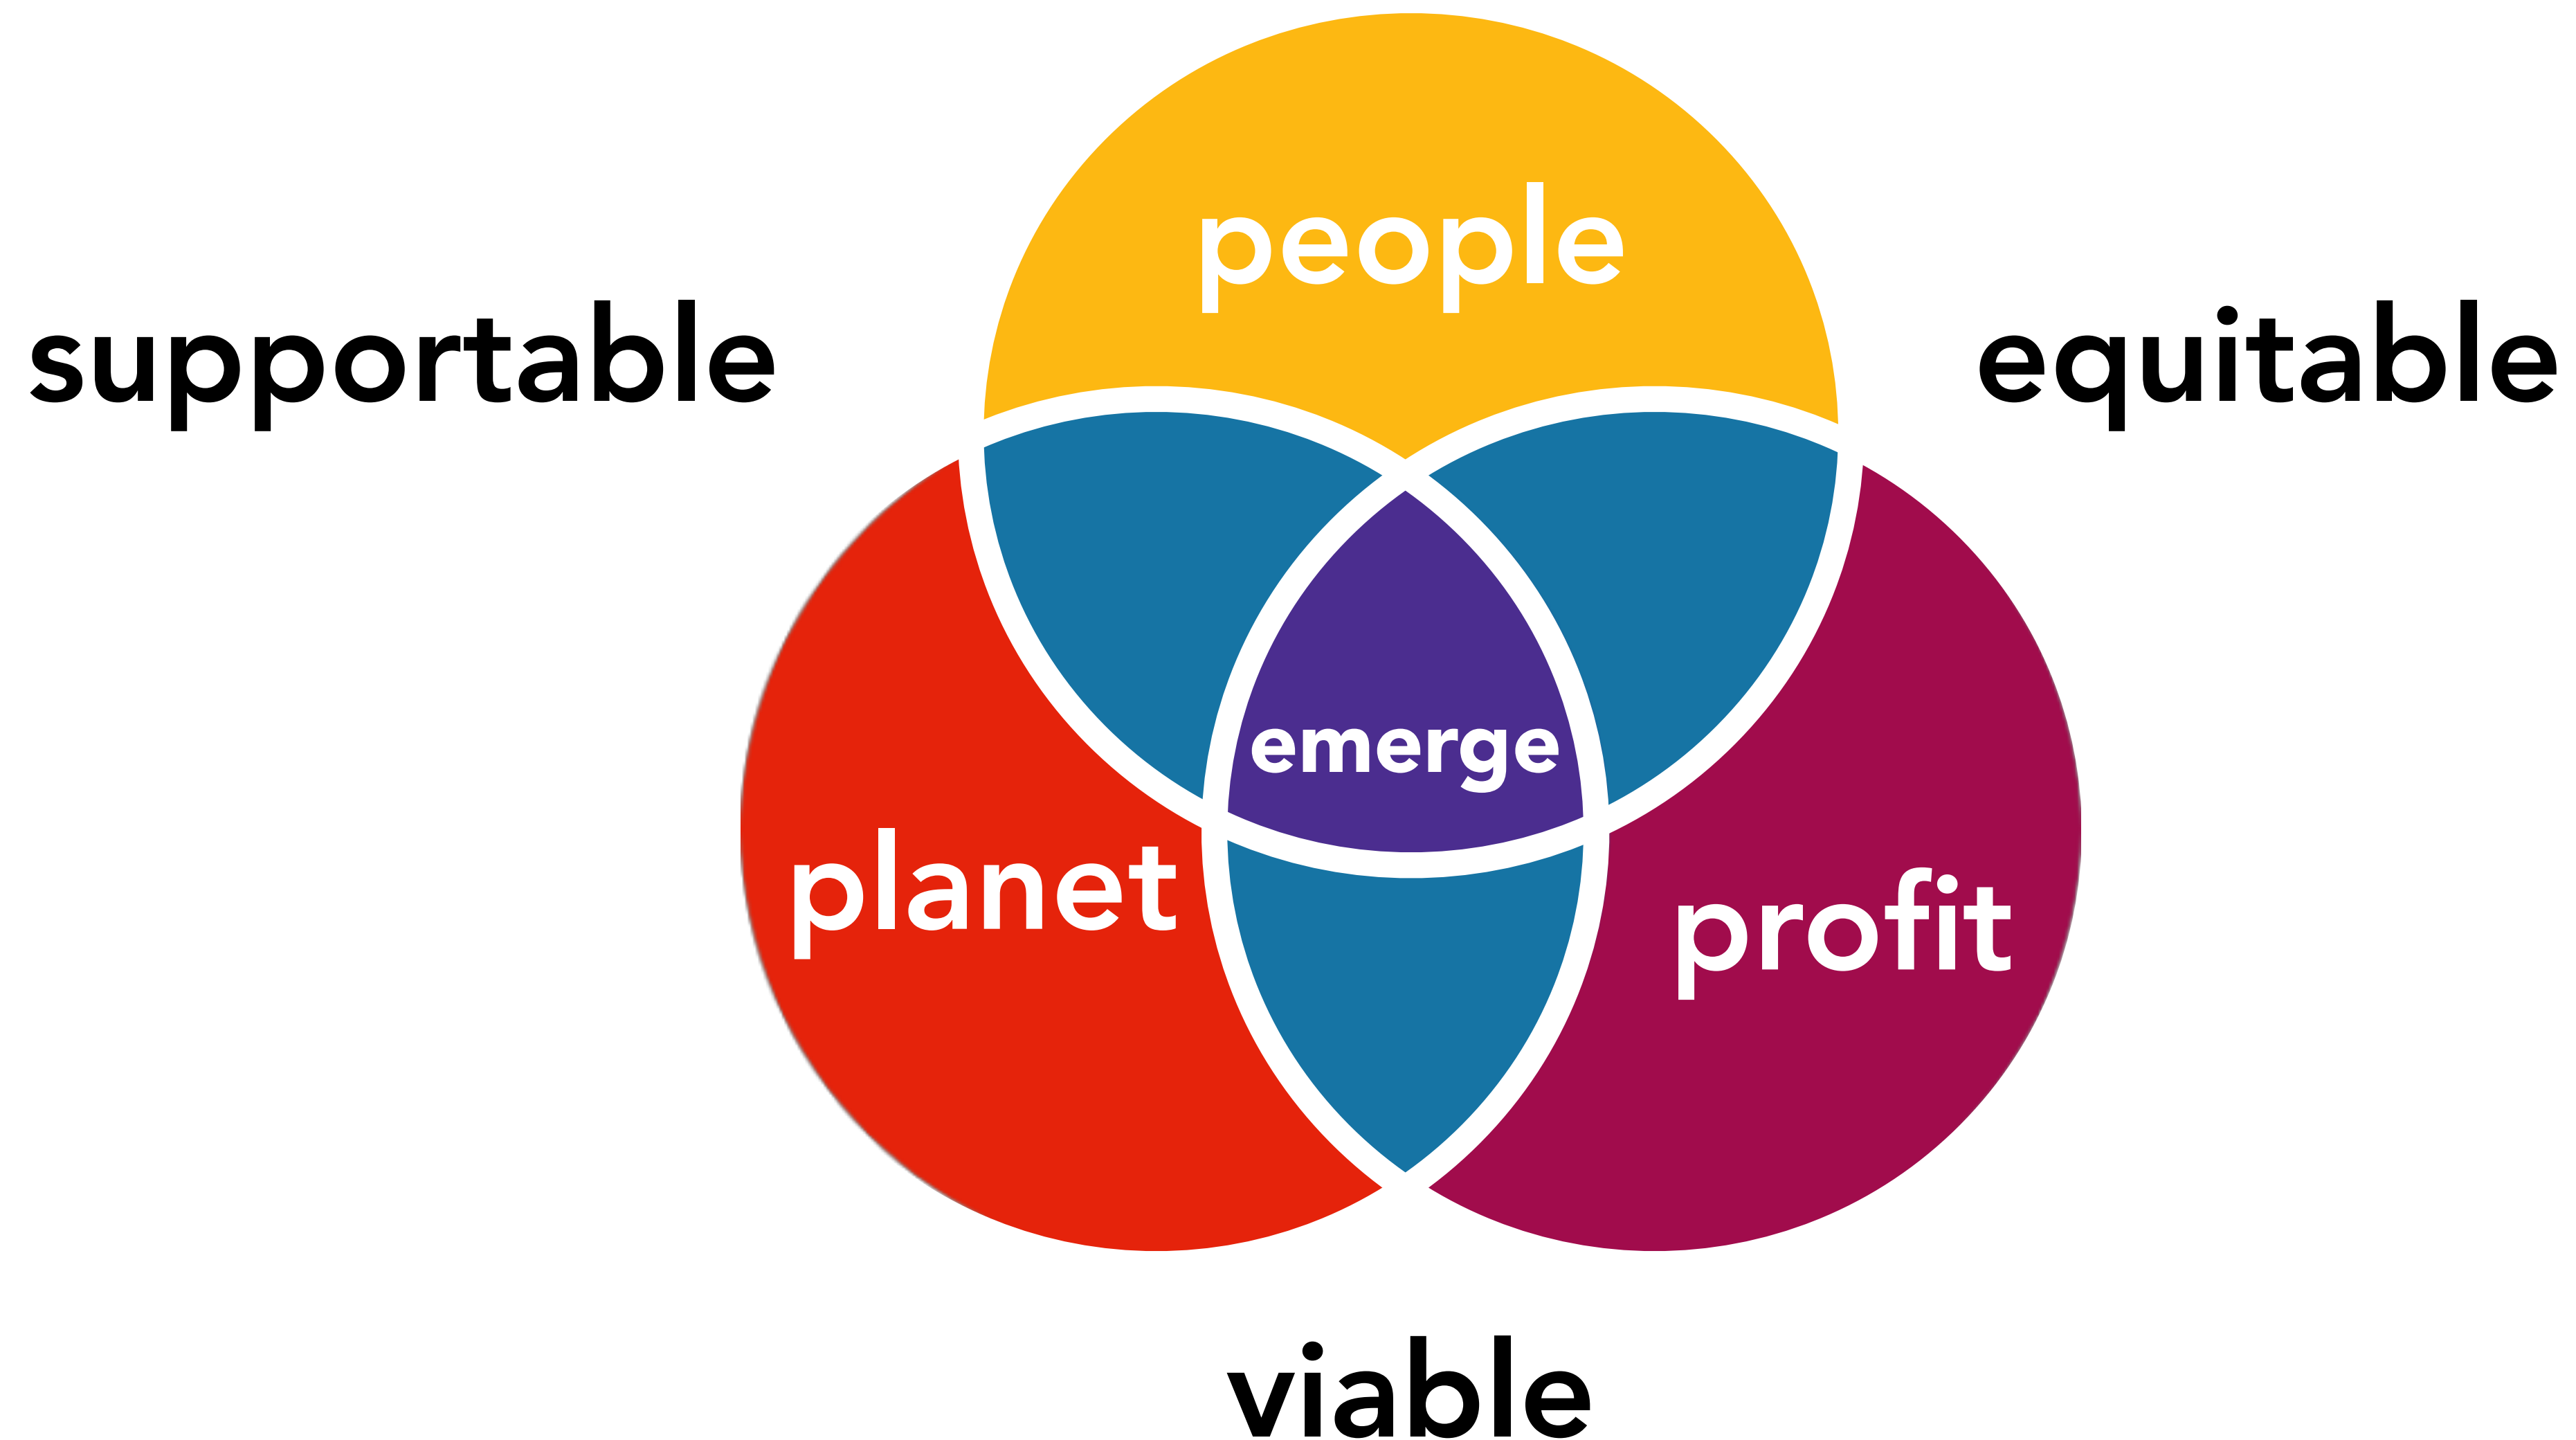

THE TIMING

THE GAPS

# OUR DESIGN PHILOSOPHY

# OUR IMPLEMENTATION PHILOSOPHY

# A GLANCE AT OUR PORTFOLIO

## BORN AT EMERGE

**HOMEWARD** is an identity management and intelligent resettlement system for displaced populations.

**SAFE HAVEN** is a disaster relief temporary net that works with international organizations to train, deploy and pay locally trained citizens in natural disaster prone countries in realtime after disaster strikes.

**THESEUS** is a logistics solution to transparently track, trace and optimize the global movement of goods, while reducing waste and fostering fair economic opportunities.

**TRUSTED VOICES** creates an immutable chain of custody for the source material used in today's news.

## REQUESTED FROM EMERGE

**LEGACY CACAO** to support a Central American indigenous tribe protect the last of this rare cacao tree.

**URBAN GREEN** to identify and commercialize new pockets of micro-green spaces across major urban cities.

**THE JUSTICE PROJECT** to protect witness information and create better chains of custody for evidence used in war crime investigations.

**SOS AMAZON** to balance out power dynamics in the fight for South America's Amazon conservation via fractionalized ecosystem asset management.

# HOMeward

INTELLIGENTLY RETHINKING REFUGEE RESETTLEMENT

Designed by emerge

# 2017 BY THE NUMBERS

**68.5 million** forcibly displaced people, as estimated by the UNHCR.

**9 out of 10** refugees remain in their region of origin.

**44,400** new displacements every day.

**52%** of refugees are children below 18 years of age.

**70,000** new stateless children are born every year in the 20 countries hosting the world's largest stateless populations.

**102,800** people were globally resettled (total), a 54% decline from 2016.

# KEY ISSUES

Overwhelming  
Concentrations of Claims  
in Sanctuary Cities

Broken System for Handling  
Humanitarian Crises

Identity and documentation  
verification

Security

Lack of global agency  
interoperability

Incomplete assessment of  
refugee integration

Refugee economic  
dependency and invalid  
education and work  
experience

Public opinion

# **ID FOR THE DISPLACED: THE BARRIER QUESTIONS**

1. WHO ARE YOU?
2. ARE YOU WHO YOU SAY YOU ARE?
3. HAVE YOU BEEN WHO YOU SAY YOU ARE THROUGHOUT THE ENTIRE PROCESS?

# **HOMeward: A TRIPARTITE APPROACH**

1. ACCESS TO SELF-MANAGED DIGITAL IDENTITY
2. INTELLIGENT RESETTLEMENT
3. CONNECTION TO A SUPPORT ECOSYSTEM

# IDENTIFYING A CLAIMANT'S INVISIBLE PROFILE

In addition to their present circumstances, displaced persons face an added barrier: they are unable to present themselves as value-add to destination countries. The bulk of their application is identity, security and displacement related, which feeds burden narratives and forces them to rely on goodwill immigration policies.

Homeward's focus on **employability potential** allows every claimant the opportunity to leverage untapped strengths in order to position themselves as future contributors to local communities. This approach also helps ensure humanitarian programs focus on the most dire and urgent cases.

The Homeward ecosystem also facilitates opt-in, remote training and education programs, allowing claimants to use wait periods productively by building on their identified strength areas.

..... UNICEF Proarammina for Dependents .....

# PRODUCT STRATEGIC VISION

## BUILDING THE FUTURE OF GLOBAL MIGRATION...

Homeward's portable digital identity system and global matching algorithm can be customized and scaled to address different experiences of displacement, as well as for those simply looking to relocate to a city most conducive to their economic and social success.

## ...THROUGH THE LENS OF THE FUTURE OF WORK

Our solution anticipates a future of work built for and by a more free-flowing labour force, with trends including flexible location options, remote work, and relocation opportunities responsive to demands for specific skills. Through its ecosystem, Homeward enables the development of those skills, as well as to employment and resettlement opportunities for all, including our global displaced population.

# THESEUS

TRANSPARENCY FROM FARM TO POINT OF SALE

Designed by emerge

# THE ISSUES

**Cost:** Supply chain solutions could reduce the amount of food wasted by \$270 billion (in value) of what is estimated to be a \$1.5 trillion problem by 2050 (BCG).

**Equity:** Farmers are routinely underpaid for their labour, particularly in emerging and underdeveloped markets.

**Waste:** Globally, we throw out about 1.3 billion tons of food a year, or 1/3 of all the food that we grow (UN).

**Health:** Romaine lettuce, in 2018 and in the US alone, was responsible for 210 E.coli cases, hospitalizing 96 people and killing 5 people in one outbreak (CDC).

**Data:** Data is siloed, creating a severely fragmented ecosystem.

**Regulation:** New policies moving toward more accountability for the entire process not just your role in it.

**Trust:** Consumers doubt the safety of daily food products they feed to their families and are demanding more transparency about the source of their products.

# CONSUMERS WILL PAY MORE FOR TRANSPARENT PRODUCTS

Overall importance of product transparency to consumers when purchasing products:
